DATE MAILED: 04/29/2004				

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/606,071	Applicant(s) MURAKAMI, SATOSHI	
	Examiner Allan R. Wilson	Art Unit 2815	<i>AW</i>

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-33 is/are pending in the application.
- 4a) Of the above claim(s) 19-28 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-5, 7-11, 13-17 and 29-33 is/are rejected.
- 7) ☒ Claim(s) 6, 12 and 18 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restrictions

Applicant's election of Group I, claims 1-18 and 29-33 on March 22, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 7, 8, 13, 14 and 29-33 are rejected under 35 USC § 102(b) as being anticipated by Iwanaga et al. ("Iwanaga") U.S. Patent No. 6,150,692.

With regards to claims 1, 7, 13, 29-31 and 33, Iwanaga illustrates in figures 1A-10, particularly figures 1F and 5, (entire document) a plurality of pixels provided with light emitting elements 57; and a thin film transistor 56 and a pixel electrode electrically connected to the thin film transistor provided at each of the plurality of pixels, wherein an insulating film 5 is provided

Art Unit: 2815

over the thin film transistor 4 and the pixel electrode 8 is provided over the insulating film, and wherein the insulating film includes an opening portion a side surface of which is curved at a light emitting region.

With regards to claims 2, 8 and 14, Iwanaga discloses in col. 8, lines 18-21, the pixel electrode comprises an oxide conductive film ITO.

With regards to claim 32, Iwanaga illustrates in fig. 1F the device further comprises a data wiring 6, and the opening portion is formed along with the data wiring.

Claims 1, 3, 7, 9 13, 15, 29-31 and 33 are rejected under 35 U.S.C. § 102(e) as being anticipated by Yamanaka et al. ("Yamanaka") U.S. Patent No. 6,346,718.

With regards to claims 1, 7, 13, 29-31 and 33, Yamanaka illustrates in figures 1-25(17), particularly figure 25(17), (entire document) a plurality of pixels provided with light emitting elements (PIXEL UNIT); and a thin film transistor (nMOS LDD-TFT) and a pixel electrode 28A electrically connected to the thin film transistor provided at each of the plurality of pixels, wherein an insulating film 28 is provided over the thin film transistor and the pixel electrode is provided over the insulating film, and wherein the insulating film includes an opening portion a side surface of which is curved at a light emitting region.

With regards to claims 3, 9 and 15, Yamanaka discloses in col. 24, lines 38-40, the insulating film 28 is a photosensitive resin film.

Claims 1, 4, 5, 7, 10, 11, 13, 16, 17, 29-31 and 33, are rejected under 35 USC § 102(b) as being anticipated by Kemmochi et al. ("Kemmochi") U.S. Patent No. 6,252,297.

With regards to claims 1, 7, 13, 29-31 and 33, Iwanaga illustrates in figures 1-11B, particularly figure 1, (entire document) a plurality of pixels provided with light emitting elements (array); and a thin film transistor (gate electrode 42) and a pixel electrode 54 electrically

Art Unit: 2815

connected to the thin film transistor provided at each of the plurality of pixels, wherein an insulating film 52 is provided over the thin film transistor and the pixel electrode is provided over the insulating film, and wherein the insulating film includes an opening portion C a side surface of which is curved at a light emitting region.

With regards to claims 4, 5, 10, 11, 16 and 17, Kemmochi discloses in col. 3, lines 6-8, the opening portion has a shape of a groove (rectangular) or a circular shape.

Allowable Subject Matter

Claims 6, 12 and 18 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Kurauchi et al. (illustrates a plurality of pixels) and Koyama et al. (illustrates a plurality of opening portions).
